

Galia:

Mehmet will be at work on friday. I will try to answer your questions:

1. Cohen Gan's platforms (tables in the dimensions you asked are built and waiting in the storage. Your cargo took three days to deliver because of incorrect information and misspelling on the ATA Carnet. But it is O.K., and in storage now.
2. The lightings of Sack's work is not yet settled. The fixtures we have here are of a different kind and carry only two bulbs per rail. We will try to come up with a different solution with the lighting people.
3. We are doing the labels. It is also best that we prepare the titles of your 2 exhibitions for uniformity.

Best Wishes,
