Hi Vasif,

Actualy,

I was not thinking of the two together and perhaps the latter ie. Specter...is too arcane, too academic in some ways to be a verbal presentation. That is why I though the archive more appropriate, especially givden your 'Platform' project and issues of memory, reconstruction and amnesia, etc. So what do you think

warm regards

Charles

Hello Charles, regarding the archive talk, I assume it will involve the specter of being human article that you wrote? Do you have a title for me?

Also, shall I invite folks from the independent history foundation here? (I mean, of course I will invite them, but I cam also make the extra effort).

Best, Vasif
