

Maybe you can build the walls at start of August and install the projector - see plan on shared folder and I leave one that has been explained with Vasif. We can then paint on my return, leaving the screen space white!

Should we order paint now? By my calculations we need to cover approx 312 square meters in

dark blue paint - S7020 R90B (main gallery, back of 2 partition walls, columns and entrance into vault).

And 91 square meters in pink paint Esen 4400/7 (entrance of gallery, front of 2 partition walls and area around window).

Obviously we should ask the paint shop to tell us what sort of contingency should be added to these figures - to cover slight miscalculation etc.

Either way they should at least be rounded up to say 320 for blue and 105 for pink.

If someone can check these figures that would be good - remembering to include columns and that the gallery plan does not include last section of space after last 2 columns.

The Tracey writing for invite card and other press is in shared folder. It is a big file! She has not yet confirmed the colours - but I attach a jpeg here so you know what I last sent her. Andrew knows about this image if you need any help - we have not used Yetkin. The text needs to be the size she wrote it in anything we print - around 8/9 cm across or ask Yetkin to measure it from the original. In fact the image on the shared folder should print at the right size.
